AIAC ASSIGNMENT 16.2

.....

Name:Thanay Nalumasa

Ht.no:2303A51424

Batch no:21

Task Descrption-1: (Design Database Schema for Student Management System)

Instructions:

• Using AI tools, generate CREATE TABLE statements for a Student Management Database.

• Tables: Students, Courses, Enrollments.

• Include primary keys, foreign keys, and suitable data types.

Ensure the schema follows normalization rules (1NF, 2NF, 3NF).

Code & Output screenshot:

SQL ▾ 1 / 1 1 - 0 of 0

```sql
CREATE TABLE Students (
student_id INT PRIMARY KEY,
name VARCHAR(100),
email VARCHAR(100)
);
```

SQL ▾ 1 / 1 1 - 0 of 0

```sql
CREATE TABLE Courses (
course_id INT PRIMARY KEY,
course_name VARCHAR(100),
credits INT
);
```

SQL ▾ 1 / 1 1 - 0 of 0

```sql
CREATE TABLE Enrollments (
enrollment_id INT PRIMARY KEY,
student_id INT,
course_id INT,
FOREIGN KEY (student_id) REFERENCES Students(student_id),
FOREIGN KEY (course_id) REFERENCES Courses(course_id)
);
```

Task Description- 2: (Insert Sample Records)

Instructions:

• Use AI tools to generate INSERT statements to populate the tables.

• Insert at least 3 students, 4 courses, and 5 enrollment records.

Verify data using SELECT queries.

Code & Output screenshot :

SQL ▾ 1 / 1 1 - 5 of 5

enrollment_id	student_id	course_id
1	1	101
2	1	102
3	2	103
4	3	101
5	3	104

SQL ▾ 1 / 1 1 - 3 of 3

student_id	name	email
1	Arjun	arjun@gmail.com
2	Meera	meera@gmail.com
3	Rahul	rahul@gmail.com

SQL ▾ 1 / 1 1 - 4 of 4

course_id	course_name	credits
101	Database Systems	4
102	Data Structures	3
103	Operating Systems	4
104	AI Fundamentals	3

Task Description- 3: (Perform CRUD Operations)

Instructions:

Use AI to generate SQL queries for basic CRUD operations:

- Retrieve all courses
- Update a student's email
- Delete an enrollment record
- Validate the changes using SELECT statements.

Code &output screenshot:

SQL ▾ 1 / 1 1 - 0 of 0

```sql
INSERT INTO Students VALUES
(1, 'Arjun', 'arjun@gmail.com'),
(2, 'Meera', 'meera@gmail.com'),
(3, 'Rahul', 'rahul@gmail.com');
```

SQL ▾ 1 / 1 1 - 0 of 0

```sql
INSERT INTO Courses VALUES
(101, 'Database Systems', 4),
(102, 'Data Structures', 3),
(103, 'Operating Systems', 4),
(104, 'AI Fundamentals', 3);
```

SQL ▾ 1 / 1 1 - 0 of 0

```sql
INSERT INTO Enrollments VALUES
(1, 1, 101),
(2, 1, 102),
(3, 2, 103),
(4, 3, 101),
(5, 3, 104);
```

Task Description- 4: (Execute Aggregate Queries)

Instructions:

Use AI tools to write aggregate queries:

• Count number of students enrolled per course

• Display courses with more than one student enrolled

Analyze the correctness of results.

Code &output screenshot:

SQL ▾ 1 / 1 1 - 3 of 3

student_id	name	email
1	Arjun	arjun_new@gmail.com
2	Meera	meera@gmail.com
3	Rahul	rahul@gmail.com

SQL ▾ 1 / 1 1 - 4 of 4

enrollment_id	student_id	course_id
1	1	101
2	1	102
3	2	103
4	3	101

SQL ▾ 1 / 1 1 - 3 of 3

course_name	student_count
Data Structures	1
Database Systems	2
Operating Systems	1

SQL ▾ 1 / 1 1 - 1 of 1

course_name
Database Systems

Task Description- 5: (Query Optimization)

Instructions:

• Use AI tools to analyze query performance.

• Rewrite inefficient sub queries using JOINs and test both queries for correctness

SQL ▾ 1 / 1 1 - 2 of 2

student_id	name	email
1	Arjun	arjun_new@gmail.com
3	Rahul	rahul@gmail.com
